DATASHEET

HDMI Cable high-speed w.Ethernet 4K60Hz 18 Gbit/s 2m white compat. w. HDMI 2.0

General data

This white HDMI™ cable from EFB-Elektronik meets the requirements for HDMI™ Version 2.0 and supports a maximum resolution of up to 4K@60Hz. It is therefore compatible with the 4K UHD (Ultra High Definition) video standard and performs particularly well with TVs, game consoles, and video cameras. The HDMI™ standard is backward compatible and works with a wide range of devices. With a bandwidth of 18 Gbit/s, even high-quality media can be transmitted effortlessly.

- Contact material: gold-plated contacts for reliable transmission quality
- HDR10: for vibrant colors and high contrast
- Maximum data transfer rate: 18 Gbps

Product benefits
HEC-compatible devices allow for the transfer of network data via an integrated Ethernet channel, eliminating the need for a separate network cable. Media playback becomes even more vivid thanks to HDR10, which transmits a wider color spectrum and finer brightness nuances.

Product description
The cable jacket is made of PVC+textile. The HDMI™ Type A connectors feature an aluminum housing, which helps prevent damage.
