Dsub Solder Plug EDS 37 LL/Z, 37-pole

AI MODIFIED

General data

The D-Sub solder connector 9 pin from EFB-Elektronik is designed for a reliable solder connection and is suitable for compact connectors with round or flat cables. With a 180° connection angle and male contact design, it supports standard-compliant applications with a clearly defined interface.

- 9-pin D-Sub solder connector for compact connectors
- 180° version with solder connection
- Male contact design for round and flat cables

The temperature range of -40 to 70 °C makes the connector designed for demanding environments. The EDS 09 LL/Z version supports a stable signal connection in applications where a precise and permanently resilient interface is required. The permissible conductor cross-section from 34AWG to 20AWG extends the range of applications for wiring.
