DATASHEET

Modular-Adapter RJ45 UTP, metal coloured

General data

The RJ45 UTP modular adapter, metallized by EFB-Elektronik, is designed as an unshielded modular adapter with female/female design. With 2x RJ45, straight design and designed for desktop mounting, it is suitable for compact integration into telecommunications applications.

• female/female with 2x RJ45 – Enables an end-to-end RJ45 connection in a space-saving desktop solution.
• Unshielded design – Supports easy integration into applications where shielded transmission is not required.
• Straight design for desktop mounting – Facilitates placement and ensures clean integration into suitable environments.

The combination of female/female design and 2x RJ45 creates a clear interface for modular connections. Due to the straight design and the design for desktop mounting, the adapter can be used flexibly in telecommunications environments. The metallized housing complements the compact design and supports robust integration into existing installations.

Technical details
• Brand: EFB-Elektronik
• Configuration: female/female
• Connector type: 2x RJ45
• Category: Telecommunications
• Mounting: Desktop
• Form: straight
• Shielded: No

Technical properties

Assembly	Desktop
Category	Telecommunications
Construction type	straight

DATASHEET

Modular-Adapter RJ45 UTP, metal coloured

Mating cycles	≥ 200
Model	jack/jack
Temperature Range (Operation)	0 – 70 °C
Type of connector	2x RJ45

Available variants

ArtNr.	Bezeichnung	screened
37507.1	Modular-Adapter RJ45 UTP, metal coloured	False

Note on Intended Use

This data sheet is intended solely to describe the technical characteristics of the product. It does not replace an assessment of the product's suitability for a specific application. The user is responsible for ensuring that the product is used in accordance with its technical specifications and applicable legal and regulatory requirements.
