

DATASHEET

Network Tool Kit with 4 units

General data

The four-part network technology tool set with bag from EFB-Elektronik bundles the most important work steps for the processing of network cables in a compact solution. With LSA application tool, RJ crimping tool, cable tester and stripper, it is designed for practical use in network technology.

- Tool set with LSA application tool, RJ crimping tool, line tester and wire stripper – Covers assembly, testing and assembly with a coordinated set.
- Suitable for LSA-Plus and RJ connectors – Supports the processing of common connection systems and increases flexibility in use.
- With stripping function and cutting device – Facilitates the preparation and processing of cables and supports a speedy workflow.

Technically, the set combines the tools relevant for network installations in a coordinated scope. Its suitability for LSA-Plus and RJ connectors makes it usable for typical processing tasks in network technology. The stripping function and

the integrated cutting device complement the range of functions for cable processing directly at the workplace.

Technical details

- Brand: EFB-Elektronik
- Form: Tool set with LSA application tool, RJ crimping tool, line tester, wire stripper
- Suitable for LSA-Plus: Yes
- Suitable for RJ connectors: Yes
- With stripping function: Yes
- With cutting device: Yes

Technical properties

Suitable for BNC plug	False
Suitable for D-Sub plug	False
Suitable for F plug	False
Suitable for F-compression plug	False
Suitable for LC plug	False
Suitable for LSA plus	True
Suitable for MT-RJ plug	False
Suitable for RJ plug	True
Suitable for SC plug	False
Suitable for SMA plug	False
Suitable for ST plug	False
Suitable for low current connector	False
With cutting device	True
With interlock device	False
With strip function	True

Available variants

ArtNr.	Bezeichnung	Unique Type
39919.1V2	Network Tool Kit with 4 units	Unique Tool set including LSA insertion tool, RJ crimping tool, wire tester, wire stripper

Note on Intended Use

This data sheet is intended solely to describe the technical characteristics of the product. It does not replace an assessment of the product's suitability for a specific application. The user is responsible for ensuring that the product is used in accordance with its technical specifications and applicable legal and regulatory requirements.
