DATASHEET

Krone LSA Insertion Tool with Sensor

General data

The LSA application tool with sensor from ADC KRONE is designed for the processing of LSA-Plus and offers a practical solution for the precise application of cores. The integrated sensor function supports positioning and ensures a controlled workflow during assembly.

• LSA-Plus Attachment Tool – Covers the processing of LSA-Plus connectors in a specialized tool and supports reliable assembly.
• Core Positioning Sensor – Facilitates the exact alignment of conductors and supports precise and reproducible processing.
• Integrated cutting device and locking device – Supports a speedy workflow and increases control during the application.

Technically, the tool is designed for LSA-Plus and is not intended for RJ, BNC, D-Sub, F, LC, MT-RJ, SC, SMA, ST or low-voltage connectors. The sensor support is used to position the wires, while the cutting device and locking device functionally complement the processing. The tool is therefore aimed at applications where a clean and controlled LSA system is paramount.

Technical details
• Brand: ADC KRONE
• Form: LSA application tool with sensor
• Variation group: LSA application tool with sensor
• Suitable for LSA-Plus: Yes
• With cutting device: Yes
• With locking device: Yes

Technical properties

Suitable for BNC plug	False
Suitable for D-Sub plug	False

DATASHEET

Krone LSA Insertion Tool with Sensor

Suitable for F plug	False
Suitable for F-compression plug	False
Suitable for LC plug	False
Suitable for LSA plus	True
Suitable for MT-RJ plug	False
Suitable for RJ plug	False
Suitable for SC plug	False
Suitable for SMA plug	False
Suitable for ST plug	False
Suitable for low current connector	False
With cutting device	True
With interlock device	True
With strip function	False

Available variants

ArtNr.	Bezeichnung	Unique	Type
39951.1	Krone LSA Insertion Tool with Sensor	Unique	LSA positioning tool with sensor

Note on Intended Use

This data sheet is intended solely to describe the technical characteristics of the product. It does not replace an assessment of the product's suitability for a specific application. The user is responsible for ensuring that the product is used in accordance with its technical specifications and applicable legal and regulatory requirements.
