DATASHEET

Cable Tidy Rail, L=700 mm for Depth 800 mm

General data

The cable support system from EFB-Elektronik is designed for lateral mounting on the 19" profile rails and supports orderly installation as well as effective strain relief by means of cable ties or Velcro tape. The steel version with a galvanized surface ensures a robust and functional solution in universal cabinet environments.

- Side cable routing with strain relief for professional rack installations
- Orderly fixation of the cables with cable ties or Velcro tape
- Galvanized steel construction in metallic design for robust use

The design is designed for functional cable support in 19" cabinet environments. With a width of 18 mm, the strip remains compact and fits into the lateral mounting on the profile rails. The steel material in combination with the galvanized surface supports a durable, practical design for structured cable routing.
