DATASHEET

19" 1U Cable Routing Panel, 5 Brackets, Plastic RAL7035

General data

The 19" 1U cable management panel from EFB-Elektronik is designed for orderly and clear cable routing at the 19" level. It can be used universally and combines a compact design with a clearly structured cable routing. The cable management panel combines steel with plastic brackets and is powder-coated in RAL 7035 grey.

• Space-saving cable management at only 1U – The panel uses a height unit and supports structured cabling with a small footprint.
• Fits 19" mounting – At 482.6 mm wide, the cable management panel is designed for standardized mounting in 19" environments.
• Robust and cable-friendly design – The combination of steel and plastic brackets combines stability with orderly routing of the cables.

The design is designed for practical use in professional 19" installations. The material mix of steel and plastic brackets creates a robust cable routing with a clear structure. With 1 U, the space requirement remains low. The width of 482.6 mm supports integration into the 19" installation. The five brackets with a bracket length of 70 mm contribute to the orderly routing of the cables.
