DATASHEET

OTDR-measurement of FO Links inclusive label with serial number

General data

The ODTR measurement of fiber optics includes the reflection measurement on the track, this is possible from a length of 30 meters. In this measurement, the attenuation is calculated by the reflecting event. For each measurement there is a protocol which is enclosed with the product and will be stored on our server under the order number. Furthermore, a winding label with serial number is attached to each cable on both sides. The price is per fiber.

Technical properties

Available variants

ArtNr.	Bezeichnung	Unique
DLOLWL-OTDR	OTDR-measurement of FO Links inclusive label with serial number	Unique

Note on Intended Use

This data sheet is intended solely to describe the technical characteristics of the product. It does not replace an assessment of the product's suitability for a specific application. The user is responsible for ensuring that the product is used in accordance with its technical specifications and applicable legal and regulatory requirements.

This datasheet was created automatically on 10-11-2026 . Technical changes reserved.
