DATASHEET

Keystone surface mount box, 1port white, w/o Keystone

General data

1-port surface mount box by EFB-Elektronik: flexible and fast cabling

The keystone surface mount box in white has x ports, designed to house network technology modules such as RJ45 or fibre optic bushings as well as multimedia modules such as USB and coax/SAT. This means that this unloaded keystone jack surface mount box can be individually adapted to the requirements of home or business environments. You will get a clear and tidy cabling without additional adapters.

1-Port Keystone junction box for wall mounting or inside enclosures

With the help of the cable ties and adhesive pads included in the scope of delivery, you can quickly and conveniently mount the keystone surface mount box in the desired location — as a junction box on the wall or inside an enclosure. Dust protection caps ensure long-lasting functionality of the network socket and the keystone modules inside. The 1-port surface mount box is therefore also suitable for cabling in dusty environments such as workshops and warehouses. The labelling field of the keystone surface mount box serves as orientation and is particularly helpful when assigning the junction box with different modules. Users can see at first glance which connection is in which
