

DATASHEET

Techly 9 in 1 USB-C™ Docking Station USB3.1 Hub Fold-able Notebook Stand

General data

The ICA-NTB DOCK91 docking station allows you to expand the configuration of your notebook by including various connections, such as to an external 4K monitor, connection to a wired network and to your favorite USB accessories, audio headphones and SD/MicroSD memories. If needed, this dock provides up to 100W of power for USB-C™ and Thunderbolt compatible laptops and tablets; The host device must support USB-C™ Power Delivery.

It can be used in conjunction with the laptop stand, which allows you to raise the laptop to facilitate heat dissipation, or be removed from the stand and used separately as an external device.

It offers nine additional ports and, thanks to its small size, it is convenient to take with you everywhere.

The notebook stand is made of aluminum alloy and is completely foldable, making it a perfect travel companion.
