DATASHEET

USB 3.0 Hub, 3-Port, 3x USB-A + 1x Gigabit LAN Al, passive, USB-C

General data

The 4-in-1 USB-C hub combines three USB-A 3.0 data ports with an RJ45 Gigabit Ethernet port. The USB-A ports support data transfer speeds of up to 5 Gbps and are suitable for USB flash drives, external drives, card readers, and other accessories. The integrated RJ45 port enables stable wired network connections at speeds of up to 1000 Mbps—ideal for laptops without a LAN port, meeting rooms, office workstations, and home offices. This combination of a USB data hub and network adapter reduces the need for multiple separate adapters. The retail packaging is plastic-free and made from 100% recycled cardboard.
