DATASHEET

WireXpert Copper- and Fiber Optic-Cable Certifier up to 2500MHz

General data

The SOFTING WireXpert 4500 Copper and fibre Cable Certifier is designed for twisted pair and offers a practical solution for the certification and analysis of network infrastructures. The LCD/monitor display supports a clear display of measured values and test results.

• Twisted Pair Design – Supports the inspection of common copper cabling and creates a robust basis for network analysis.
• Network Protocol Measurement – Expands the range of applications during acceptance and helps to capture relevant logs in the cabling environment.
• Measured value memory and PC/printer interface – Saves measurement results and facilitates documentation and further processing in the test process.

In the environment of the WireXpert 4500 from the series of copper and fibre optic cable certifiers, the device combines an LCD/monitor display with memory functions and a PC/printer interface. This allows measurement results to be directly recorded, checked and transmitted for further evaluation.

Technical details
• Brand: SOFTING
• Display type: LCD/Monitor
• Suitable for: Twisted Pair
• Suitable for network protocol measurement: Yes
• Measured value memory: Yes
• With PC/printer interface: Yes

Technical properties

Measured value memory	Ja
Suitable for network protocol measurement	Ja

DATASHEET

WireXpert Copper- and Fiber Optic-Cable Certifier up to 2500MHz

Type of indication	LCD/monitor
With PC/printer interface	True

Available variants

ArtNr.	Bezeichnung	Suitable for
WX4500-FA-V2	WireXpert Copper- and Fiber Optic-Cable Certifier up to 2500MHz	Twisted Pair

Note on Intended Use

This data sheet is intended solely to describe the technical characteristics of the product. It does not replace an assessment of the product's suitability for a specific application. The user is responsible for ensuring that the product is used in accordance with its technical specifications and applicable legal and regulatory requirements.
